**DAMATE**  
GROUP OF COMPANIES

**Dairy plant «Penzensky»**, OJSC (Molkom, OJSC) is the largest dairy processor in Penza region. Dairy plant «Penzensky» has been supplying the entire Penza region with dairy products since 1985. In 2011 the enterprise joined the Damate group — Russian agricultural holding company, involved in three businesses: turkey production and processing; milk processing and dairy farming. The group's operations are located in Penza and Tyumen regions.

The product range of the enterprise comprises over 100 Molkom brand items and includes healthy dairy products without added sugar and dairy baby food.

The company goes under large scale reconstruction and processes up to 300 tones per day.

**JSC MOLKOM** was established in 1985 and since then has become the biggest dairy – processing company and cheese producer in Penza region.

- For over 30 years we have been producing high quality dairy products made of only fresh and natural milk.
- We focus on the needs of all groups of consumers offering over 60 different products.

Since its early days, Molkom has been enjoying high consumer demand for its products both by children and adults. Those who have ever tried Molkom products always choose them.

**JSC MOLKOM** has been a producer of only natural and high quality products.

- We love the work we are doing and aware of responsibilities for population health. We are doing everything for you to start your day with fresh natural dairy product.
- We produce our milk and dairy products for those who take care of their loved people and make all possible to provide them with only fresh and natural products.
- We produce the products for our families and children.
